Surface Mounted Truck Leveler with Wheel Focused Truck Restraint

The combination of Autoquip Surface Mounted Truck Leveler, Wheel Focused Truck Restraint, and Integrated Dock Control Panel, Provides the most versatile loading system available today. Any truck that arrives at the dock can now be serviced by the existing Dock leveler. All Trucks that arrive at the dock can be secured with the wheel truck restraint. Product, Dock Equipment and Employees are protected by a control panel that utilizes forced sequential operation. Interior and Exterior Light Communication is easily understood. This system also communicates to the inside dock attendant when the truck is in position and has been restrained properly.

UIDSS

DOCK DOOR

Our Universal Integrated Dock Safety System* (UIDSS) can be configured to include the WIJ-T. This system provides the safest loading dock system possible. By forcing sequential operation, the WIJ-T and trailer restraints must be in place *before* the dock door or dock leveler can be used. We specifically designed this system to monitor itself and protect against human error providing the highest degree of protection for employees and equipment.
